

CATAPULT

Connected Places

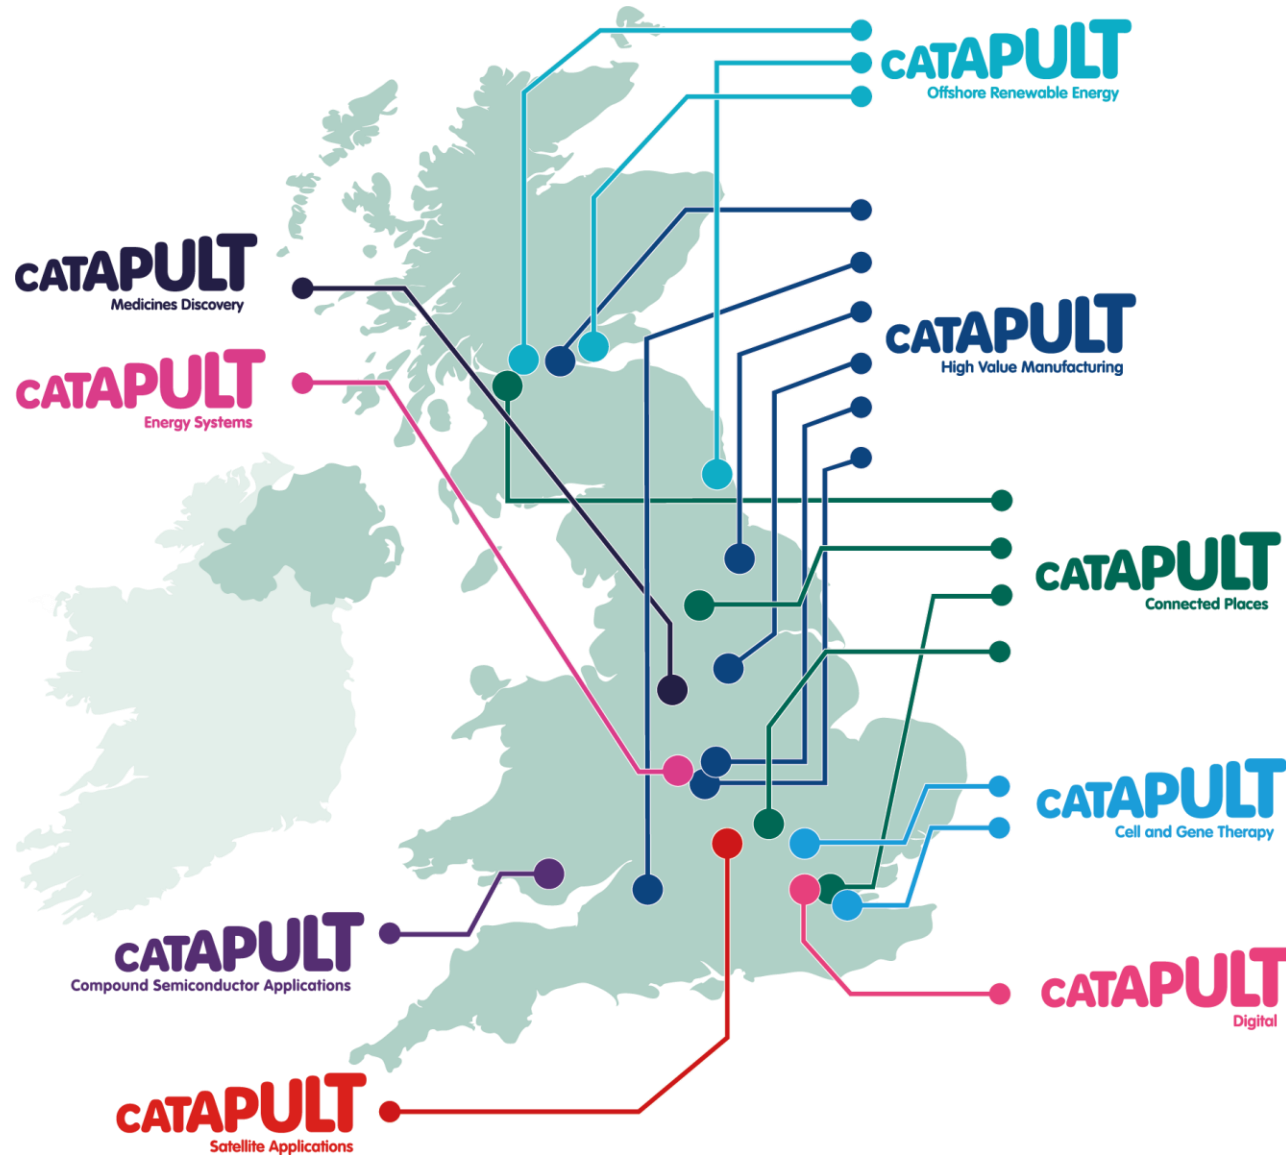

Who Are we

Steve Quantick

Strategic Business Development Director – Connected Places Catapult

Catapults – a force for innovation and growth

9

Innovation Centres across the UK

A network of world leading centres designed to transform and accelerate the UK's capability for innovation and future economic growth.

The Connected Places Catapult role

To drive jobs and growth the Connected Places Catapult:

- **Increases the supply of proven products and services that meet market demand**
by helping companies to commercialize innovation through demonstration, testing and market exposure.
- **Identifies new areas for market making and disruption**
by stimulating richer engagement between academics, SMEs and businesses.
- **Boosts demand for innovation from intelligent customers**
by providing joined up support to public authorities and industry

Is part of

- **A network of 9 world leading Independent and neutral Catapult centres**
designed to transform and accelerate the UKs capability for innovation and future economic growth.

Level crossings

Download the guide,
understand the warnings

There are many different types of level crossings and protection measures in place across Britain's rail network. Do please plan ahead, be prepared and pay extra care and attention on and around level crossings.

For more information about using them safely and to understand the different warning signs and signals, download our free level crossings user guide.

It's available in accessible and BSL formats at [networkrail.co.uk/levelcrossings](https://www.networkrail.co.uk/levelcrossings)

For BSL and audio content, download 'Signly Network Rail' for free from the Apple App Store or Google Play and point your device at this leaflet.

CALVIUM^o

Calvium is a leading digital technology agency
combining expertise in experience design,
software engineering and mobile innovation.

Richard Hull, Executive Chairman

BlockDox Patented Technology on Trains, Platforms & Stations

Real-time passenger footfall analytics

Data Analytics to Help Shape, Manage & Deliver Smarter Stations

- Optimise boarding & alighting times
- Manage disruption & capacity
- Plan future station design & timetabling
- Understand passenger numbers
- Mitigate & manage risks
- Manage revenue protection

GDPR Compliant!!

Infrastructure productivity: How to save \$1 trillion a year

The screenshot displays the Podaris web application interface. The browser address bar shows the URL: <https://app.podaris.com/projects/vsZYMybbTuxM2kWAH/views/mJ9HQp4WcpLMFLYLM>. The application header includes the Podaris logo, the project name "Milton Keynes 2", and the version "Podaris v1.5.2". A search bar is present with the text "Search this project".

The main map area shows an aerial view of a road network. A prominent red line with white arrowheads is drawn across the map, representing a planned route. The map includes a toolbar on the left with various navigation and editing tools, and a "Map Satellite" toggle at the top. The right sidebar contains a "Tool: Measure" section with a "Clear" button and a "Total Length: 0 m" display. Below this is a "Layers" panel with buttons for "Add", "Duplicate", and "Import", and a list of layers including "PRT Pilot Loop - CMK Axis", "PRT Phase 1 - CMK", "PRT Phase 2", and "PRT Phase 3". An "OVERLAYS" section at the bottom of the sidebar shows an "OVERLAY Overlay" layer.

Testbeds - Stations

What is a testbed?

- A proving ground to **develop, test and showcase** the best new technologies that solve real challenges
- A place to **collaborate** with companies, academics and users
- **Reduce the risk** and the up-front investments in innovations
- Deployment at difference **scales** to test products or services before investing in full-scale development
- **Verify and validate** early in development, enabling new business opportunities and knowledge to develop
- A place to **inspire** others with sustainable, innovative solutions

“By improving trains, tracks and stations right across the country, we will deliver more reliable, frequent and comfortable journeys for passengers and better connect our communities”
Rail Minister, Andrew Jones
